Addis Ababa, Ethiopia

Summary

Hi, I'm Sanyi I'm a 16-year-old developer and founder focused on turning ideas into real, impactful products. I'm driven by curiosity and a strong belief that technology can solve everyday problems at scale. I spend most of my time building, experimenting, and improving my skills, especially in areas like AI, problem solving, and scalable systems. One of the projects I've built is YScroll, an app designed to help people reduce time spent on short-form content like TikTok, YouTube Shorts, Instagram Reels, and X. After struggling with this problem myself, I decided to build a solution. Within the first 2 weeks of launch, YScroll reached 3,000+ installs, in less than 2 Weeks and growing. I'm continuously working on new ideas, exploring different product directions, and sharpening my technical skills. Other projects- PinShot – A visual feedback tool that scaled to 900+ users and generated 1,400+ comments within 2 weeks.- Go2Cod (Co-Founder) – Mentored and trained 700+ interns worldwide in full-stack web development and real-world projects.- Beeka AI – An AI-powered study assistant that creates notes, quizzes, flashcards, and chat to help students learn smarter. My long-term goal is to build impactful, scalable products and create a successful startup that reaches millions of people. Beyond, Coding and building I'm a content creator with over 40K+ Audience, I do contents on LinkedIn, Youtube and X. For brand deals and collaborations: sanyidiriba123@gmail.com All of this wouldn't be possible without my God :)

Experience

Shiplog

Founder

June 2026 - Present (1 month)

You ship the features, we write your changelog.

ShipLog reads your commits, PRs, and merges and rewrites them into a beautiful changelog your users actually understand and see.

A2SV | Africa to Silicon Valley

Software Engineer Trainee

January 2025 - Present (1 year 6 months)

As an A2SVian, I am actively exploring my future career as a software engineer. I am currently focusing on understanding data structures and algorithms, which are fundamental to effective programming. I dedicate time to mastering these concepts daily, recognizing their importance in building efficient and scalable software solutions. I am wholeheartedly committed to this journey and confident in my ability to acquire new knowledge and continuously enhance my skills in the ever-evolving field of technology.

YouTube

Developer YouTuber

February 2025 - Present (1 year 5 months)

Documenting my journey as a developer & founder through tech and startup content.

150K+ views and 6K Subs, sharing real builds, ideas, and growth.

Go2Cod

CEO, Co-Founder

September 2024 - January 2026 (1 year 5 months)

Ethiopia

As the CEO and Co-Founder of Go2Cod, I am dedicated to empowering aspiring coders through real-world, project-based internships.

Mentored and trained 700+ interns worldwide in full-stack web development and hands-on projects.

Focused on bridging the gap between theory and practice by helping interns gain technical expertise, teamwork experience, and portfolio-ready skills.

Built an environment of mentorship and collaboration where interns learn directly from real-world projects and industry practices.

At Go2Cod, our mission is to prepare the next generation of tech professionals with the practical knowledge needed to thrive in a rapidly evolving industry.
